📍 Faisalabad

SUMMARY

I am a passionate CS student (currently persuing BSCS in UCP Faisalabad) focusing on core methodologies of system design and development.I enjoy coding backends in NodeJS .I believe that one should focus on big picture of how things work.He should blend theoretical concepts with practical implementation.Then he will be able to (control) his code on how to make things work better according to all aspects.I started python when diving into DSA and AI.I shocked how python is blended with every field of AI.Utilizing it with computer vision and LLMs make me lover of AI forever.Beyond coding,I read books about computer science and robotics.

EDUCATION

- 01/2023
- Degree and Field of Study
University of Central Punjab (UCP)
- Date period
- Intermediate , Computer Science
Punjab Group Of Colleges

SKILLS

Nodejs	MongoDB	NextJS	Supabase	Firebase	Your Skill
